DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-7, drawn to pet mastication article, classified in class 119, subclass 709.
- II. Claims 8-14, drawn to method of making a pet mastication article, classified in class 426, subclass 1.

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, invention I can be made by another and materially different process than vacuum sealing. Invention I could be made by spraying the agent on the article, dipping the article, tumble/agglomeration, cold or hot temperature treatment, etc.

Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.

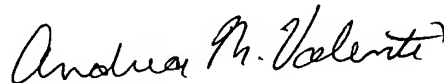

A telephone call was made to John D. Gugliotta on 1 March 2004 and 26 February 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
